

# BREWED AT THE LION BREWERY

The Lion Brewery is a one million hectolitre capacity production site, brewing cask, keg, can and bottled beers. In addition, Camerons has brewing contracts with a number of global brewers. The company is committed to providing leading contract brewing services in the UK through its continual improvement strategy and implementation of world class manufacturing techniques and standards; it holds both the BRC and ISO 9001 (AA) accreditations. In 2015 the brewery invested £1.5m on a brand new purpose built bottling line capable of operating at 10,000 bottles per hour. Due to demand a new canning line was installed in early 2020 allowing the brewer to offer a full brew and packaging operation.
